

THE SPIKE

The SPIKE is a weapon worn on the right wrist, specifically designed for extracting vital liquid. When used during an attack, it significantly increases the amount of vital liquid drained from a victim.

Thanks to its blade, the extraction is faster and more efficient than a traditional attack using fangs or claws. A single use of the SPIKE allows you to drain between 10 and 40 liters of vital liquid, depending on your selection.

When you activate the SPIKE button on your HUD, the system automatically scans nearby players.

Their names will appear in a selection menu, allowing you to choose your target. Once the victim is selected, a second menu appears, letting you define the amount of vital liquid to drain during the attack.
